Introduction

Crystal stones is a gem coin developed and deployed on CoreDaO blockchain backed by solid minerals to serve the purpose of supporting miners of mineral resources in maximizing the use case of our solid minerals both in research and discoveries then bringing infrastructure to the Blockchain space with our natural resources as the world evolves.

Crystal Stone project is a benchmark for the application of Blockchain technology in physical assets that integrates Blockchain with our natural resources.

Project Mission

Mineral resources generally refers to all naturally rock resources buried in the ground or distributed on the surface.

We have had alot of discoveries of these minerals in our world, the challenges has been on how to maximise its use case to its full potentials, in other cases is lack of funding and proper attention or man power...

It is the aim of Crystal Stone to fix the issues surrounding global mining with the help of Blockchain in the following ways.

Crystal Stone is here to offer real economic and social value adding a new dimension for financial institution to easily adapt blockchain, securely extend business processes and application while at the same time reduce operation cost.

Mineral resources being the basic pillar of national economic production and construction, Crystal Stones is here to launch a new type of pass through economic model of blockchain and money resources, based on deep cooperation and research with legally held mineral/energy and mining qualification enterprise.

We are here to create new wealth in private sector by harnessing Crystal Stones technology.

Crystal Stone is committed to pioneer digital asset securitization In Africa.

One of the major challenges facing the mining industry in Africa is corruption. Corruption has been a major hindrance to the growth of the mining industry, as it leads to loss of revenue and resources. However, with the implementation of blockchain technology, corruption can be eliminated. Crystal Stone is here to bring a technology that provides a transparent and immutable ledger that can be accessed by all stakeholders, making it difficult for corrupt practices to be perpetrated.

Another challenge facing the mining industry in Africa is the lack of transparency.

Crystal Stones is here to eliminate corruption and enhance transparency.

CRYSTAL STONES TOKENOMICS

✓ Circulating supply: 90%

✓ Initial Burn: 10%

✓ Liquidity: 30%

✓ Dev Team: 7%

✓ Marketing: 15%

✓ Staking reward: 9%

ANTI WHALE MECHANISM

- ✓ Maximum wallet hold: 1,500,000
- ✓ Buy and Sell limit: 1,000,000

Trading Tax

- ✓ Buy 3%
- ✓ Sell 3%
- ✓ Total 6%

Tax Share

- ✓ Liquidity 2%
- ✓ Marketing Wallet 0.9%
- ✓ Burn on every transaction 0.1%

CRYSTAL STONES ROAD MAP

Phase 1

- > Setting up social media presence
- > Developing the crystal Stone website
- > Mapping a marketing strategy
- > Launch of Crystal Stones token
- > Hitting 1000 Holders

Phase 2

- > To be Whitelisted on Icecreamswap
- > Listing on other Dex
- > Building strategic relationships through frequent Ama
- > Airdrop campaign
- > Initial Burn Mechanism
- > CAC Registration

CRYSTAL STONES ROAD MAP

Phase 3

- > Initial Cex listing
- > kick-starting the development of CrystalStones dex
- > Strategic Partnership with local and foreign based mineral and energy enterprise
- > Release of CrystalStones launchpad
- > Hitting 10000 holders of CrystalStones token
- > Charity outreach

Phase 4

- > 50,000 holders of Crystal Stones token
 - > Development of the Crystal Stones exchange
 - > Building the Crystal Stones Blockchain and it's ecosystem
- Incoming!!!
